System & Network Solutions Partners with Stratum Global to Provide Best-In-Class RFID Offerings in Latin America

Littleton, CO — September 9th, 2005 — Stratum Global and System & Network Solutions, Inc. (SNSI) have announced a strategic partner relationship. SNSI is pursuing RFID opportunities in Latin America, Puerto Rico and Europe as well as opportunities in select markets in the United States.

SNSI has a consistent history of working with organizations across different verticals, with unique challenges, all using technology as a means to achieve business process improvement. Providing best-in-class RFID business solutions demands a clear comprehension of emerging technologies and focus on industry challenges at the customer level. This strategic business relationship equips SNSI with Stratum Global's **TagNet** RFID Solutions – for Closed-Loop, Asset Management, and Compliance.

“Stratum’s ongoing commitment to partner with organizations that have a proven track record of success is highlighted here yet again,” said, Bill Hood, chief operating officer, Stratum Global. “SNSI has extensive experience in the supply chain arena, managing full-scale ERP implementations as well as cross-platform application integration projects. They understand the complexity of their customer’s businesses, which is crucial to the success of a successful RFID implementation. In addition, by focusing on their Latin American customers, SNSI helps to broaden Stratum Global’s solutions reach internationally.”

“SNSI has been evaluating RFID solutions over the last six months, looking for a product that would be the best fit for our existing client base,” said, Alvaro Barrera, chief technology officer, SNSI. “We are excited about this new opportunity and the promise of RFID. Many of our clients in Latin America and in the United States are looking at RFID as a means to solve inventory inefficiencies and improve work(s) in progress. Some clients are under compliance mandates. We carefully evaluate ways to meet those

mandates while looking for ways to find return on investment, without costly customizations or product add-ons.”

About System & Network Solutions

For more than six years, System & Network Solutions, Inc. (SNSI) has been helping their clients succeed with various information technology projects. SNSI has experience with a wide variety of ERP solutions such as MAPICS, Daly.Commerce, Logistic Pro, and nuBridges. SNSI assists our customers with defining requirements, evaluating solutions, planning implementations, and with the technical support required to successfully complete IT projects. Our expertise in Radio Frequency Identification (RFID), EDI, Supply Chain Management, and Customer Relationship Management has enabled our customers to integrate their applications, processes and hardware platforms to meet their business challenges. SNSI specializes in providing companies with technical expertise to develop and grow their businesses through all of the extreme demands they encounter.
