### **Stratum Global Announces TagNet RFID Solution Suites for DoD & Retailer Compliance**

Configurable solutions including software, infrastructure, labels, hardware and services designed for immediate compliance with a foundation for future scalability.

Oak Brook, Ill. – June 20, 2005 – Stratum Global today announced its TagNet RFID Solution Suites for companies facing RFID compliance. Stratum Global now offers three distinct RFID solutions for DoD and Retailer compliance using the Electronic Product Code (EPC). The TagNet RFID Solution Suites for compliance provide companies with an affordable solution to address their immediate compliance requirement. The customer can now configure the components as part of their solution with leading RFID hardware vendors such as Intermec, AWID, Zebra and Kathrein. The compliance solution suites allow Stratum Global to provide customers with what they want and require, while eliminating the need to seek multiple vendors to implement a total solution.

“We are providing our customers with configurable cost-effective RFID solutions that address their immediate needs for compliance,” said Bill Hood, chief operating officer, Stratum Global, Inc. “The immediate benefit is being able to share RFID data between the supplier and retailer, thus increasing efficiencies in the supply chain.”

#### **TagNet RFID Solution Suites for Compliance**

**TagNet RFID Compliance** provides labeling software, RFID printer and tags as well as services to meet basic compliancy requirements for slap n’ ship.

**TagNet RFID Compliance with Tag Verify** offers additional verification capability to confirm 100% read accuracy of RFID Tags as they leave the facility.

**TagNet RFID Compliance with Ship Verify** represents a more advanced solution for compliance with ROI benefits. When the tag is verified during shipment at a reader portal (e.g. a dock door) , information is sent real-time into the business logic of the ERP or WMS enterprise system for validation purposes and for downstream supply chain processes such as EPC Shipment History and EDI advanced ship notices.

“An RFID solution is much more than just purchasing readers and tags.” said Bill Hood. “It’s important to recognize the value that RFID software, infrastructure and integration plays in this equation. The ability to invest in the infrastructure from the beginning and build as it is necessary, illustrates the value that a scalable RFID solution can provide. If you’re going to make any RFID investment due to mandates, you need to consider what internal value that investment can offer your organization in the next 12 months or 3 years.”

#### About Stratum Global

Stratum Global offers complete RFID-enabled solutions for Closed-Loop, Compliance and Asset Management that integrate into any back end solution. Stratum Global delivers best-in-class business solutions with a solid understanding of the RFID industry’s key issues, current trends and recognizing that each customer has unique needs and complex requirements. Our goal is to eliminate costly customizations for our customers and provide an RFID solution that operates optimally.
